Vista Telecom Networks, Inc.

Corporate Overview

Vista provides and maintains wireless telecom infrastructure for a wide variety of industries. We have extensive experience and expertise in Network Installations, Engineering & Design, Hardware, Installation Audits, Towers & Structures, and Network Maintenance. Our clients include companies in the Telecommunications, Oil & Gas, Government, Commerce, and Electric Utility sectors.

At Vista, we pride ourselves in being true partners with our clients, listening to ensure we understand their requirements, and fulfilling these requirements with proper expertise. We are nimble and often adapt to meet a client's needs, providing the right resources which allow them to concentrate on their core business while we excel with our core business. We deliver high quality broadband wireless infrastructure on budget, while meeting or bringing in schedules. Our goal is to impress our clients with quality - while doing what we say we are going to do.

"Our success in deploying this network is a direct result of our partnership with Vista. With Vista's infrastructure and expertise, we delivered the largest wireless project in TELUS' history to date, and in record time."

- Joe Theberge, Director Wireless Implementation West, TELUS

We offer our clients world-class installations resulting from a combined industry and training experience totalling hundreds of years. We partner with our clients and help them to achieve their goals.

Whether it is new turnkey network infrastructure, radio retrofits, or a preventative maintenance program, Vista has the depth of experience, breadth of capability, and manpower to deliver. Vista has grown over 15 years and now has offices in Edmonton and Calgary, and three warehouses to offer the services and responsiveness that our clients demand.

Industries

No matter what industry you are in, there is likely a requirement for broadband data communications to support applications from simple broadband Internet access to complex Surveillance Systems employing hundreds of Internet Protocol (IP) video cameras. A Broadband

Let Vista maintain your network so you can focus on your core business.

Applications

- Wireless Backhails
- Private Wireless Networks
- Last Mile Connectivity
- Leased Line Alternatives
- Temporary Wireless Networks
- Office Network Infrastructure
- Network Video Surveillance Systems

Technologies

- Microwave Networks
- Cellular Networks
- Power Systems
- Structured Cabling
- Wi-Fi Networks
- Network Video Surveillance

Wireless Network from Vista will meet the needs of most broadband applications while providing a solution that is low cost, scalable, and flexible. Vista provides infrastructure that supports broadband wireless backhails, distribution, and end user access.

Applications

Broadband Wireless Networks provide data connectivity that:

- Enables revenue generation
- Increases efficiency & productivity
- Improves business performance
- Delivers broadband data services to areas where copper or fiber will not reach for several years

Vista is a market leader in enabling organizations to achieve their goals, by applying wireless broadband technology to solve data connectivity problems. Vista assists customers by providing:

- Wireless Backhails
- Private Wireless Networks
- Last Mile Connectivity
- Leased Line Alternatives
- Temporary Wireless Networks
- Office Network Infrastructure
- Network Video Surveillance Systems

“Vista has proven to be an extremely valuable partner for us. The Vista team understands the importance of gaining cost efficiencies while delivering a highly reliable network for its clients. We feel confident when working with Vista, because they are committed to helping Pengrowth achieve success.”

- Don Ind, Senior Network/Security Analyst, Pengrowth Corporation

Services

Vista provides several services for customers seeking to deploy or maintain Broadband Wireless Network infrastructure to improve business performance. Vista helps customers achieve their goals by providing:

- Network Installations
- Engineering & Design
- Hardware Source
- Installation Audits
- Towers & Structures
- Network Video Systems
- Network Maintenance
