

Secure corporate revenue with a Broadband Wireless Network by Vista

Services

- Network Installations
- Engineering & Design
- Hardware Source
- Installation Audits
- Towers & Structures
- Network Maintenance

Oil & Gas Applications

- Wireless Data Backhauling
- SCADA
- Video Surveillance (security, safety)
- Remote Internet Access
- Production Data Access
- Performance Improvement
- Telemetry
- Tank Level Inventories
- Voice over Internet Protocol (VoIP)

VISTA Wireless Telecom Infrastructure

Vista Telecom Networks, Inc.

Oil & Gas Market Profile

Vista brings broadband wireless data connectivity to remote, underserved, and un-serviced sites, enabling applications that reduce costs and secure corporate revenue. Vista provides broadband wireless connectivity to support many applications with highly flexible and scalable infrastructure, increasing efficiency and productivity at sites ranging from corporate headquarters to remote battery sites. Vista broadband supports:

- Wireless Data Backhauling
- SCADA
- IP-based Video Surveillance (security, safety)
- Remote Internet Access
- Production Data Access
- Performance Improvement
- Telemetry
- Tank Level Inventories
- Voice over Internet Protocol (VoIP)

“Vista has proven to be an extremely valuable partner for us. The Vista team understands the importance of gaining cost efficiencies while delivering a highly reliable network for its clients. We feel confident when working with Vista, because they are committed to helping Pengrowth achieve success.”

- Don Ind, Senior Network/Security Analyst, Pengrowth Corporation

Clients are no longer in the dark with data provided by Broadband Wireless Infrastructure from Vista. Valuable production information allows operations to monitor trends and events to be able to fine tune production and utilize resources efficiently, and this can be done with a cost effective Private Wireless Network by Vista.

Services

Vista enables Oil and Gas applications with a wide range of services that include:

- Network Installations
- Engineering & Design
- Hardware Source
- Installation Audits
- Towers & Structures
- Network Video Systems
- Network Maintenance

With a breadth of capability and abundance of experience, Vista is well

Let Vista manage your network so you can focus on your core business.

Applications

- Wireless Backhuls
- Private Wireless Networks
- Last Mile Connectivity
- Leased Line Alternatives
- Temporary Wireless Networks
- Office Network Infrastructure

Technologies

- Microwave Networks
- Cellular Networks
- Power Systems
- Structured Cabling
- Wi-Fi Networks

positioned to help clients not only install and maintain broadband wireless networks, but manage them as well. Too often clients lack internal expertise and corporate tenure to effectively manage telecom networks. Vista partners with clients to perform comprehensive data communications planning and coordination - Vista manages client networks to ensure clients maximize the financial and operational benefits that broadband wireless connectivity can offer.

About Vista

Vista provides and maintains wireless telecom infrastructure for a wide variety of industries. We have extensive experience and expertise in Network Installations, Engineering & Design, Hardware, Installation Audits, Towers & Structures, and Network Maintenance. Our clients include companies in the Telecommunications, Oil & Gas, Government, Commerce, and Electric Utility sectors.

At Vista, we pride ourselves in being true partners with our clients, listening to ensure we understand their requirements, and fulfilling these requirements with proper expertise. We are nimble and often adapt to meet a client's needs, providing the right resources which allow them to concentrate on their core business while we excel with our core business. We deliver high quality broadband wireless infrastructure on budget, while meeting or bringing in schedules. Our goal is to impress our clients with quality - while doing what we say we are going to do.

We offer our clients world-class installations resulting from a combined industry and training experience totalling hundreds of years. We partner with our clients and help them to achieve their goals.

Whether it is new turnkey network infrastructure, radio retrofits, or a preventative maintenance program, Vista has the depth of experience, breadth of capability, and manpower to deliver. Vista has grown over 15 years and now has offices in Edmonton and Calgary, and three warehouses to offer the services and responsiveness that our clients demand.

“Our success in deploying this network is a direct result of our partnership with Vista. With Vista’s infrastructure and expertise, we delivered the largest wireless project in TELUS’ history to date, and in record time.”

- Joe Theberge, Director Wireless Implementation West, TELUS
